Ubiquity Steel Detailing Services provides Structural Steel Detailing Services and Rebar Detailing Services for the Construction and Engineering Industry and CADD & BIM services for the Architectural Industry. With specialized Engineers and Detailers, we have successfully completed and delivered detailing projects to Fabricators all over the United States & Canada. We provide estimating, design, detailed engineering, detailing and shop drawings, 3D BIM modeling and project and construction management for a wide range of Material Fabricators and Suppliers, Contractors and Builders, Design-Build Firms, Consulting Engineers. At Ubiquity Steel Detailing, we have some of the most qualified and experienced drafters and detailers in the industry. We have a team with Architects, Structural engineers, Draftsmen, detailers, modelers, and checkers that work six days a week.

We offers services in industrial, commercial, architectural, and miscellaneous steel detailing, custom-tailored to each project's needs.

To meet the needs of our clients, we focus on providing quality shop drawing packages within budget and on time. We specialize in structural (beams, columns, braces) and miscellaneous (stairs, railings) steel structures in several different industries. We use both SDS2 & Tekla software's and can provide model files and CNC, KSS for your shop's needs.

VISION & MISSION

Vision

To be the most trusted and dependable steel detailing partner for fabrication companies across North America — recognized for our precision, reliability, and commitment to excellence.

Mission

To deliver accurate, code-compliant, and error-free steel detailing solutions that empower our clients to build efficiently, safely, and confidently — while fostering long-term partnerships through transparency, quality, and service.

OUR SERVICES

Ubiquity has a dedicated team of 15+ steel detailers, experienced Project Managers, QC Head, Team Leads, and Project Leads for structural steel detailing work. All the team members are trained on international standards.

Steel Detailing

We offer comprehensive solutions to the steel detailing needs of a wide array of clients ranging from fabricators, contractors, designers, and structural engineers. Being a leading steel detailing company we have the technical expertise and manpower to handle steel detailing for 10,000 tons per month. Since 2015 we have been offering steel detailing services of impeccable quality by strictly adhering to the international industry standards in steel detailing which include AISC, ANSI, OSHA & RSIO to name a few.

3D Modeling & Shop Drawings

We offer structural 3D modeling services focused on facilitating better product/structure visualization and helping our clients convey their design concepts through accurate 3D models. Our complete structural shop drawings show material sizes and dimensions (for beams, purlins, girts, columns, trusses etc.)

Software's we use

Our steel detailers are well versed in using the latest versions of the software, which includes Tekla Structures, Autodesk Revit, AutoCAD, and SDS/2. For complex projects, our steel detailers come with unique solutions which help the engineers to effectively manage the design and the fabricators to carry out the manufacturing process.

OUR SERVICES

Miscellaneous Steel Detailing

Our team provides precise shop drawings and 3D models for a wide range of miscellaneous steel elements, including: Stairs and Stair Stringers, Handrails and Guardrails, Ladders and Cage Ladders, Canopies, Supports, Brackets.

Material Takeoff

We provide accurate and detailed material take-offs to help fabricators, contractors, and engineers estimate costs, plan procurement, and optimize project timelines.

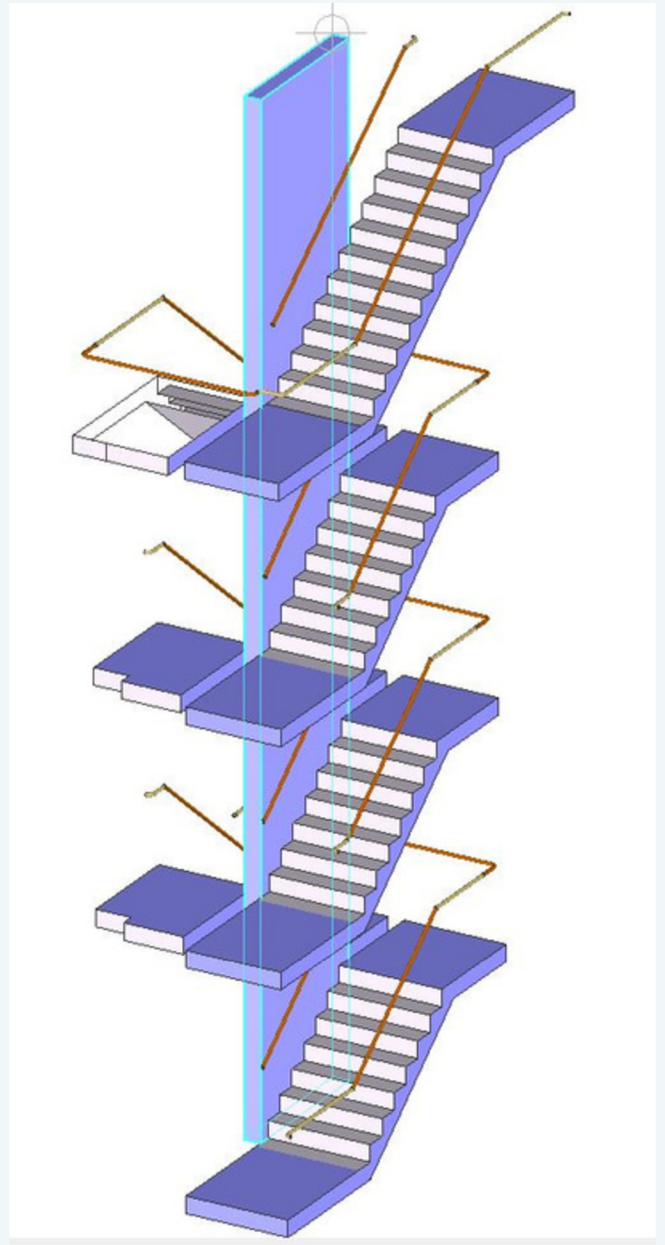

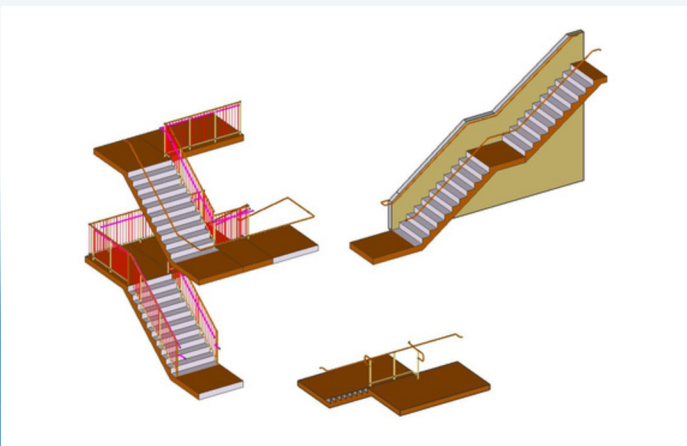

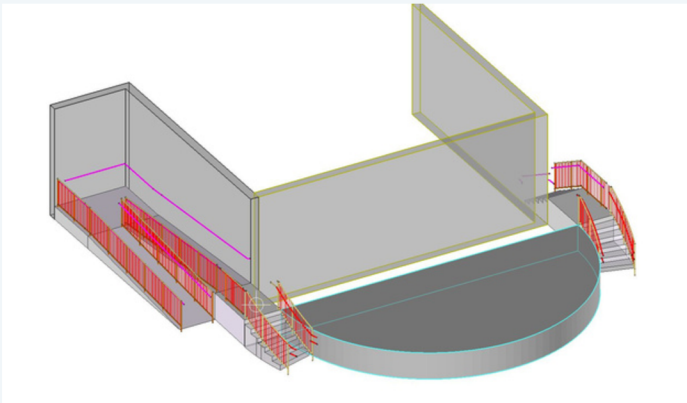

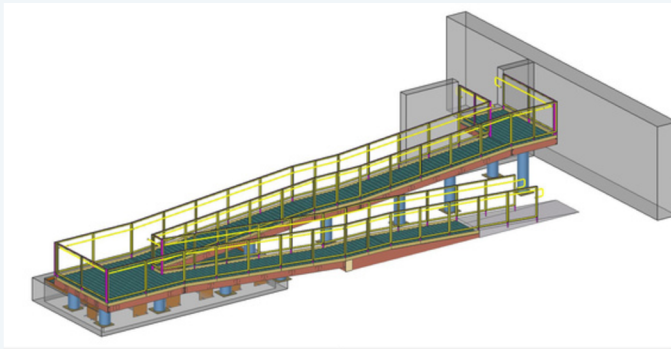

Revision and coordination services

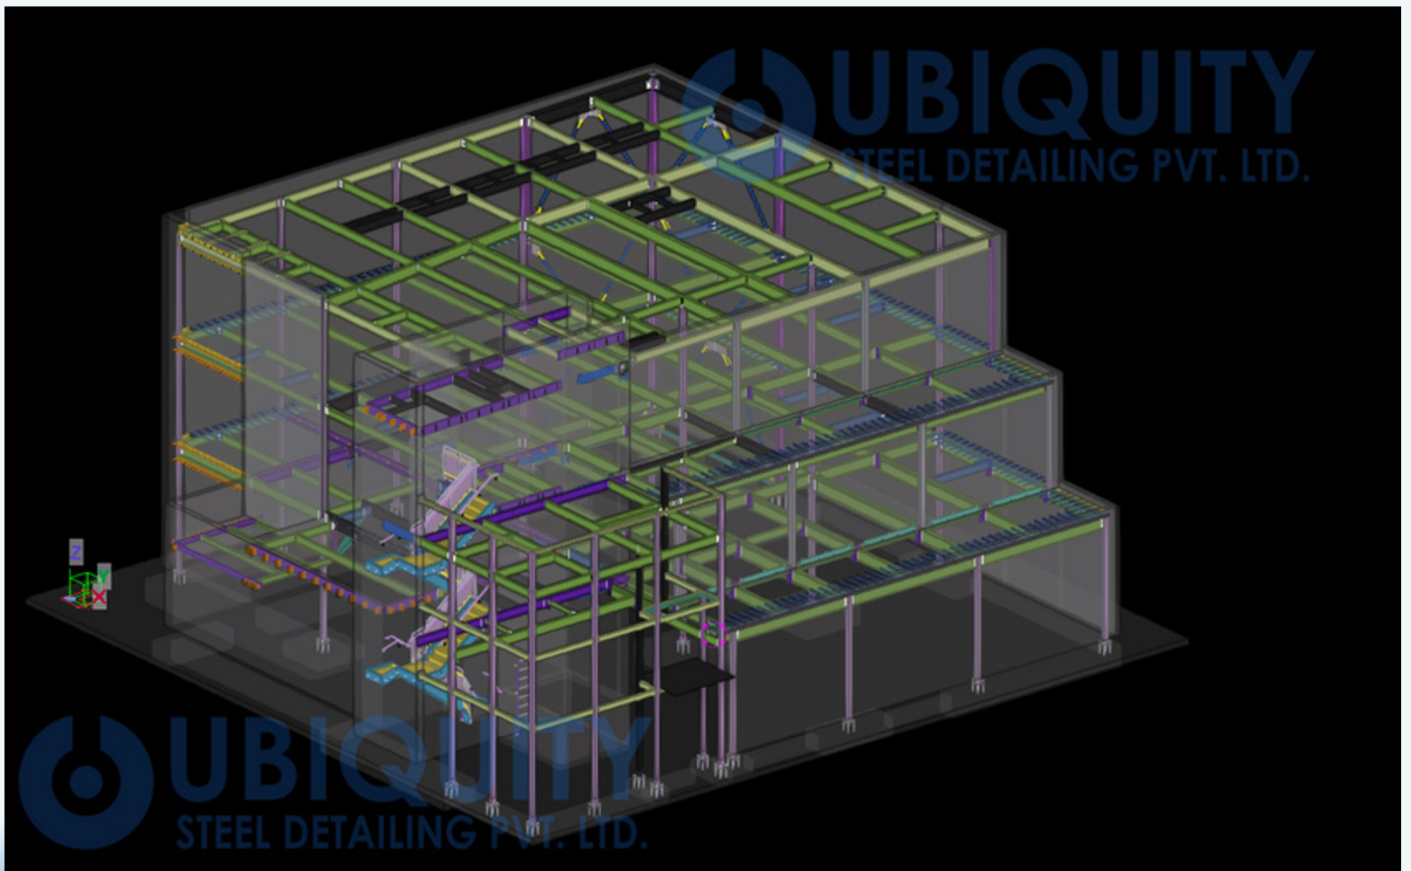

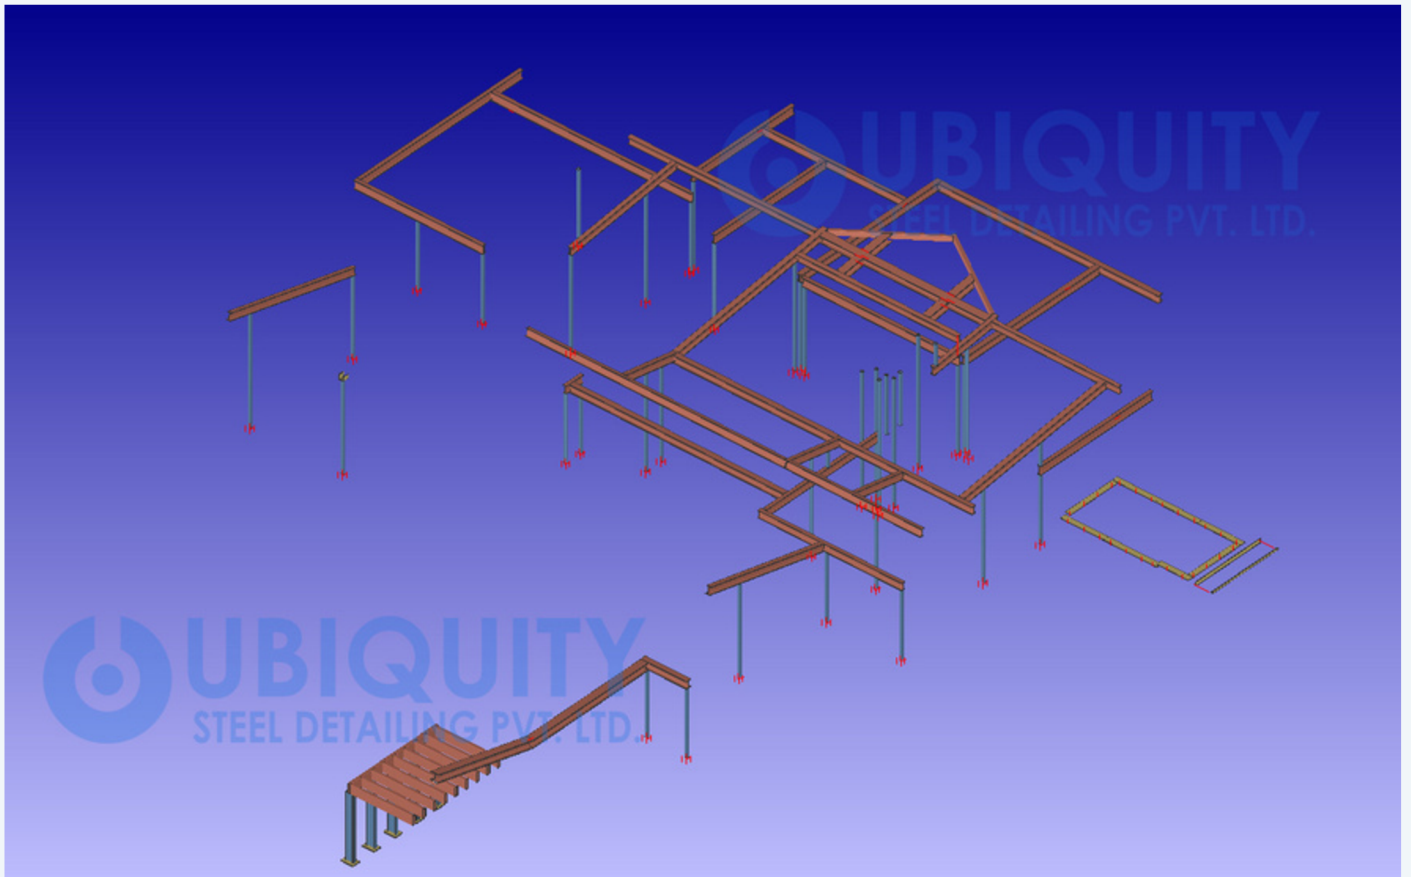

We assist with: Coordinating RFIs and markups, Integrating design changes, Resolving clashes and constructability issues, Smooth coordination with engineers, fabricators, and GC teams.

OUR PROJECTS

***We have completed many projects for Steel Fabricators based in USA & Canada.
